

# AWEA OFFSHORE WINDPOWER CONFERENCE & EXHIBITION 2019

## POST SHOW REPORT

Interest in offshore wind has exploded in the three years since the Block Island Wind Farm became the first U.S. offshore wind project. States up and down the East Coast have made big commitments to offshore wind, and there are intriguing projects in the works off California's coast and the Great Lakes. The momentum and excitement for offshore wind continued leading into AWEA's 2019 Offshore WINDPOWER Conference & Exhibition in Boston. The conference hit capacity with nearly **1,300 attendees** between the two days of the conference, and over **75 exhibitors**.

### Top attended **SESSIONS**

- The Long and Short Game for US Offshore Wind Success
- Pioneers & Innovators Corner - What's Next For Offshore Wind?
- State Spotlights
- Multi-State Industrial Clustering to Achieve the Most Cost-Effective Supply Chain
- Understanding the Federal Agency Puzzle - Roles in Development and Permitting
- Entering the OSW Supply Chain
